PROJECTS

Basic FireBase Social Media App with CRUD Designed and developed a comprehensive social media application leveraging Firebase as the backend technology stack. Implemented full-stack capabilities for user authentication, real-time data synchronization, and seamless CRUD (Create, Read, Update, Delete) operations. The app provides users with a simple platform to connect and engage with each other through posts, comments, and likes ([Social Media App](#))

Sound Maker By harnessing the power of OOP concepts, the Sound Maker app offers users a platform to explore the world of sound, experiment with different parameters, and craft their unique auditory experiences. Whether users are musicians, sound enthusiasts, or curious learners, this app provides an avenue for creativity and sonic exploration.([Sound Maker](#))

Food Waste Management using Google Sheet Backend Developed a dynamic web application aimed at reducing food waste and addressing hunger-related challenges.Utilized Google Sheets as a backend solution to facilitate user registration and efficient food distribution ([Feeding Poor](#))
